This data is given in "HW07Train.csv" file.

Write R code to predict if the people with the following characteristics will visit again or not. Compute probabilities for each case. If the probability is greater than 0.5, visitor will visit again.

| Visitor ID | Previously Visited | Session Length | Page Views | |
|------------|--------------------|----------------|------------|--|
| 26 | No | Short | Low | |
| 27 | Yes | Short | Medium | |
| 28 | Yes | Average | Medium | |
| 29 | Yes | Long | High | |

This data is given in HW07Test.csv file.

Verify these answers using Excel (optional).

The answer to this problem is as follows. Make sure your R code generate these answers.
